

3.25IN Emergency Decompression Needle

DESIGNED BY
CMC MED SOLUTIONS

VO91924.1

When seconds count, you need a tool you can trust. Our Emergency Decompression Needle is designed for rapid, effective relief of tension pneumothorax in critical situations. Built for reliability and ease of use, it's an essential addition to any emergency medical kit.

Key Features

+ RAPID DEPLOYMENT

Designed for quick access and easy application, ensuring immediate response in emergency situations.

+ OPTIMAL LENGTH AND GAUGE

Engineered with a length and gauge suitable for a variety of patient sizes, ensuring effective decompression without the risk of damage to underlying structures. Offered in a wide variety of sizes for all your diverse patient care needs.

+ HIGH-VISIBILITY DESIGN

Bright, easy-to-see markings and color-coded components for rapid identification and use under pressure.

+ STERILE AND READY-TO-USE

Individually packaged in a sterile environment, ensuring the highest level of patient safety. 5 year Shelf Life.

+ PATENT PENDING SAFETY CAP AND LOCK

Equipped with a safety cap to protect the needle before use, minimizing the risk of accidental injury. Lockable cap allows for providers to contain the used needle back inside the container to prevent a sharps injury.

+ DURABLE CONSTRUCTION

Made from high-quality, medical-grade materials to ensure reliability and performance in the field. Catheter is comprised of kink resistant FEP that is clear to allow for visualization of drainage site with two radiopaque strips.
